SUMMARY

Data engineer who turns messy event streams into reliable, well-modelled warehouses that analysts trust.

EXPERIENCE

Senior Data Engineer | Grubhub **Mar 2021 – Present**

- Designed a Kafka streaming layer that moved order events into Snowflake in under 90 seconds end to end
- Cut warehouse spend 35% by rewriting the heaviest Spark jobs and adding incremental dbt models
- Owned on-call for the ingestion platform serving 14 product teams

Data Engineer | Groupon **Jul 2017 – Feb 2021**

- Migrated 300 cron scripts into Airflow DAGs with lineage, retries and SLA alerts
- Built the deal-performance mart used by 200 account managers every morning

Business Intelligence Analyst | Morningstar **Jun 2015 – Jun 2017**

- Published Tableau dashboards for fund flows that replaced a weekly 40-page PDF report
- Automated SQL quality checks on 60 vendor feeds
